Conference

We are experiencing an unprecedented era in the history of urbanization. Some of the defining challenges of the 21st century are managing the pace of urban growth, creating new approaches in architecture, increasing the quality of living spaces, as well as controlling the environmental quality. At the same time, they also present an opportunity to create living spaces that are smarter, more efficient, more sustainable, and more equal and safer.

In meeting these challenges and opportunities, we invite the submission of original papers related to (but not limited to) the following topics:

- Roots of Architecture;
- New Architecture;
- Challenges and Inspiration in heritage and history; in new technologies and media;

- Reshaping Architecture, reshaping Cities;
- Protection of Heritage, restoring Traditions;
- New Media in Art and Architecture;
- The role of New Technologies (nanotechnology, robotics, etc);
- Research for Future Cities (the future of the City);
- Sustainability and sustainable Architecture;
- Resilient Development;
- Smart development, smart houses;
- 3D-printed houses

The Conference topics are also the **Exhibition** topics. We kindly invite the perspective architects, town planners and artists to submit their projects, drawings, and photographs that respond to the scope of the above listed topics.
